Notes:

- (1) Travel figures shown in this column through 1993 are originally based on gasoline and use year. fuel sales by county, then adjusted from all available traffic count data. After 1993, travel estimates were first based on traffic counts, and then adjusted by changes in county fuel consumption and population from the previous.
- (2) These figures are primarily derived from factored traffic counts on State System Highways.
- (3) These figures are *best estimates of actual vehicle travel* – judicious use is suggested.
